You can prepare your 156-315.80 dumps pdf anytime, We make a solemn promise that all 156-315.80 exam dumps shown public & buyers are valid and reliable, please rest assured to buy.

You can use the practice test software to check your learning outcomes, What you need may be an internationally-recognized 156-315.80 certificate, perhaps using the time available to complete more tasks.

Just look at the warm feedbacks from our loyal customers, they all have become more successful in their career with the help of our 156-315.80 practice engine, When there are some sale promotion or you need to use the discount, please you confirm the discount condition or 156-315.80 discount code with the online service or write emails to us.

NEW QUESTION: 1

You have a private cloud infrastructure that uses System Center 2012 R2 Virtual Machine Manager (VMM).

You plan to host several hundred private clouds for different customers by using the infrastructure.

You need to ensure that all of the customers can use any IP address range in their private cloud. What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A.** Create a virtual machine network that uses network virtualization.
- B.** Create a virtual machine network that uses VLAN network isolation.
- C.** Install a VMM Network Virtualization for Generic Routing Encapsulation (NVGRE) gateway in each private cloud.
- D.** Install the IP Address Management (IPAM) Server feature in each private cloud.

Answer: A

Explanation:

Network Virtualization introduced in Windows Server 2012 Hyper-V provides administrators with the ability to create multiple virtual networks on a shared physical network. In this approach to isolation, each tenant gets a complete virtual network, which includes support for virtual subnets and virtual routing. Tenants can even use their own IP addresses and subnets in these virtual networks, even if these conflict with or overlap with those used by other tenants.
