NEW QUESTION: 1

DRAG DROP

You are developing a SQL Server Integration Services (SSIS) project by using the Project Deployment model.

The project contains many packages. It is deployed on a server named SQLTest1. The project will be deployed to several servers that run SQL Server 2012.

The project accepts one required parameter. The data type of the parameter is a string.

A SQL Agent job is created that will call the Loading.dtsx package in the project. A job step is created for the SSIS package.

The job must pass the value of an SSIS Environment Variable to the project parameter. The value of the Environment Variable must be configured differently on each server that runs SQL Server. The value of the Environment Variable must provide the server name to the project parameter.

You need to configure SSIS on the SQLTest1 server to pass the Environment Variable to the package.

Which four actions should you perform in sequence by using SQL Server Management Studio? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer:

Explanation:

Box 1:

Box 2:

Box 3:

Box 4:

NEW QUESTION: 2
