### **NEW QUESTION: 1**

DRAG DROP

You have a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) deployment. The deployment includes the collections described in the following table.

Configuration Manager has the client settings configured as shown in the following table.

You need to identify which additional hardware inventory classes will be collected from Computer2 and Computer3.

What should you identify? To answer, drag the appropriate hardware inventory classes to the correct computers. Each hardware inventory class may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

#### **Answer:**

Explanation:

Explanation/Reference:

When you create a custom set of client settings, you include in this custom list only those settings that should differ from the default. Any settings not included on the custom list will be derived from the default settings automatically.

### **NEW QUESTION: 2**

- B. The Linux machine must be powered off.
- C. The Linux machine must use a static IP address.
- D. The Linux machine must have a fully-qualified domain name.

**Answer: C**

### **NEW QUESTION: 3**

Josh needs to associate the Price and ProductName fields of the Sales database with fields from the

Inventory table in a relational database. His company uses DECS. He has created a Data Connection

Resource to handle the connection to the Inventory table.

What is the next step to make this connection available to fields on the Product form?

- A. From the Advanced tab of the Database Properties, select "Allow connection to external databases"

using DCRs". From the Defaults tab of the product form properties dialog, click Browse by the Data

Source Options and select the DCR.

**B.** From the Advanced tab of the ACL, select "Allow connection to external databases using DCRs". From the Security tab of the Form Properties dialog, click Browse by the Data Source Options and select the DCR.

**C.** From the Basics tab of the Database Properties, select "Allow connection to external databases using DCRs". From the Defaults tab of the Form Properties dialog, click Browse by the Data Source Options and select the DCR.

**D.** From the Advanced tab of the Database Properties, select "Allow connection to external databases using DCRs". From the Data Connection Resource Properties, click the Product form under "Connection enabled for".

**Answer: C**
