accurate Oracle 1Z0-1064-20 dumps to our exam user.

And they are software and pdf and app versions, Errandsolutions is offering very reliable 1Z0-1064-20 real questions answers, If you want to have a general review of what you have learned, you can choose us.

You can download and use our 1Z0-1064-20 training materials only after 5 to 20 minutes, which marks the fastest delivery speed in the field, You are eligible to get 90 days free updates after purchasing 1Z0-1064-20 exam.

NEW QUESTION: 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section. You will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a database that tracks orders and deliveries for customers in North America. The database contains the following tables:

Sales.Customers

Application.Cities

Sales.CustomerCategories

Your company is developing a new social application that connects customers to each other based on the distance between their delivery locations.

You need to write a query that returns the nearest customer.

Solution: You run the following Transact-SQL statement:

The variable @custID is set to a valid customer.

Does the solution meet the goal?

A. No

B. Yes

Answer: B

Explanation:

Explanation

ShortestLineTo (geometry Data Type) Returns a LineString instance with two points that represent the shortest distance between the two geometry instances. The length of the LineString instance returned is the distance between the two geometry instances.

STLength (geometry Data Type) returns the total length of the elements in a geometry instance.

NEW QUESTION: 2

A customer has an Aruba solution with APs, MCs, and an MM The customer also uses AirWave and ClearPass. The customer wants to add Aruba CX Switches, which use per-user tunneled node, to the solution.

How should the Aruba CX Switches integrate with the existing solution in order to determine when to tunnel device traffic to MCs?

- A. They should implement authentication to ClearPass.
- B. They should be managed by AirWave with SNMPv3.
- C. They should be manually added as MDs in MM.
- D. They should be directed to MCs by a DHCP or DNS server.

Answer: D

NEW QUESTION: 3

Select the five tasks that need to be performed on the Automated Installer (AI) install server before setting up the client.

- A. Create the AI install service. Specify the path to the AI network boot image ISO file and the path where the AI net image ISO file should be unpacked.
- B. Download the AI boot image. The image must be the same version as the Oracle Solaris OS that you plan to install on the client.
- C. The DHCP server must be enabled on the install server and must provide the DHCP service for the clients.
- D. Set up a IP address on the AI install server.
- E. Create a local IPS repository on the AI Install server and start the repository server service, the publisher origin to the repository file.
- F. Download the text install image into the IPS repository.
- G. DHCP must be available on the network for the Install server and the clients, but the install server does not need to be the DHCP server.
- H. Install the AI installation tools.
- I. Create the AI install service. Specify the path to the AI network boot image ISO file and the path to the IPS repository.

Answer: D,F,G,H,I

Explanation:

B: Configure the AI install server to use a static IP address and default route.

D: The create-service command can set up DHCP on the AI install server. If you want to set up a separate DHCP server or configure an existing DHCP server for use with AI. The DHCP server must be able to provide DNS information to the systems to be installed.

E: An automated installation of a client over the network consists of the following high-level steps:

1. The client system boots over the network and gets its network configuration and the location of the install server from the DHCP server.
2. The install server provides a boot image to the client.
3. Characteristics of the client determine which installation instructions and which system configuration instructions are used to install the client.
4. The Oracle Solaris 11 OS is installed on the client, pulling packages from the package repository specified by the installation instructions in the AI install service.

G: Install the AI tool set.

Use the installadm create-service command to create an AI install service. Give the service a meaningful name, and specify the path where you want the service created. Specify the source of

the network boot image (net image) package or ISO file.

installadm create-service [-n svcname] [-s FMRI_or_ISO] [-d imagepath]

-d imagepath The imagepath is the location of the new install service. The

install-image/solaris-autoinstall package is installed to this location, or the specified ISO file is expanded at this location.

Reference: Installing Oracle Solaris 11 Systems, Create an AI Install Service

NEW QUESTION: 4

The Sawgrass Health Center is an institution that trains healthcare professionals and performs various clinical and other types of healthcare-related research. Because Sawgrass receives government funding, it is required to provide medical care for the poor. Of the following types of health plans, Sawgrass can best be described as:

- A. A medical foundation
- B. A community health center (CHC)
- C. An academic medical center (AMC)
- D. A healthcare cooperative

Answer: C
