They pay attention to niceties and accuracy of content of 1Z0-1064-21 pass-sure materials: Oracle B2B Service 2021 Implementation Essentials more than any anything in the world, Good study guidance, We offer you a unique opportunity of examining our Oracle 1Z0-1064-21 products prior to place your buying order.

Pass Guaranteed 2022 1Z0-1064-21: Efficient Oracle B2B Service 2021 Implementation Essentials Pdf Braindumps

We will provide the after-sale service for 7/24 hours online the whole year so that we contact

with our customers and reply their email or online news about 1Z0-1064-21 exam dumps materials from different countries.

If you are willing to purchase 1Z0-1064-21 from Errandsolutions's updated audio exam or 1Z0-1064-21 updated simulation questions, you can download the 1Z0-1064-21 Oracle updated demo and make it sure that you are buying the best material.

In a word, you can communicate with us about 1Z0-1064-21 test prep without doubt, and we will always be there to help you with enthusiasm, After you complete your learning task of the 1Z0-1064-21 practice material, you will be proficient in relevant skills.

We provide 7/24 free customer support via our online chat [Online C_S4CFI_2102 Tests](#) or you can contact support via email at Errandsolutions, you will benefit a lot from it, Many candidates know if they can obtain a suitable certification (here Oracle 1Z0-1064-21 guide) they will obtain a better position but they can't find the best way to prepare the real tests.

You still have enough time to work and relax.

NEW QUESTION: 1

DRAG DROP

You need to use Azure Automation State Configuration to manage the ongoing consistency of virtual machine configurations.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Answer:

Explanation:

Select and Place:

Explanation/Reference:

Explanation:

Step 1: Assign the node configuration.

You create a simple DSC configuration that ensures either the presence or absence of the Web-Server Windows Feature (IIS), depending on how you assign nodes.

Step 2: Upload a configuration to Azure Automation State Configuration.

You import the configuration into the Automation account.

Step 3: Compiling a configuration into a node configuration

Compiling a configuration in Azure Automation

Before you can apply a desired state to a node, a DSC configuration defining that state must be compiled into one or more node configurations (MOF document), and placed on the Automation DSC Pull Server.

Step 4: Onboard the virtual machines to Azure State Configuration

Onboarding an Azure VM for management with Azure Automation State Configuration Step 5:

Check the compliance status of the node.

Viewing reports for managed nodes. Each time Azure Automation State Configuration performs a consistency check on a managed node, the node sends a status report back to the pull server. You can view these reports on the page for that node.

On the blade for an individual report, you can see the following status information for the corresponding consistency check:

The report status - whether the node is "Compliant", the configuration "Failed", or the node is "Not Compliant" (when the node is in ApplyandMonitor mode and the machine is not in the desired state).
