Finally, we are not heady with success, but treasure the chances dealing with your problems and questions about our 1z0-1036-21 free torrent all the time, Bountiful discounts for second purchasing.

NEW QUESTION: 1
Your organization uses Microsoft Exchange on-premises and you deploy Microsoft Dynamics CRM 2016 on-premises. Which feature must you enable to use folder-level tracking?
A. smart matching
B. server-side synchronization
C. Email Router
D. forward mailbox
Answer: D

NEW QUESTION: 2
A company is currently using the following configuration:
IAS server with certificate-based EAP-PEAP and MSCHAP

Unencrypted authentication via PAP

A security administrator needs to configure a new wireless setup with the following configurations:
PAP authentication method

PEAP and EAP provide two-factor authentication

Which of the following forms of authentication are being used? (Select two.)
A. PEAP- MSCHAP
B. EAP
C. MSCHAP
D. EAP-PEAP
E. PEAP
F. PAP
Answer: D,F

NEW QUESTION: 3
Which statement about the ASA redundant interface is true?
A. By default, the first physical interface that is configured in the pair is the active interface.
B. It can only be used for failover links.
C. It is a logical interface that combines two physical interfaces, both of which are active.

D. The redundant interface uses the MAC address of the second physical interface in the pair.
Answer: A

NEW QUESTION: 4
Your network contains an Active Directory domain named contoso.com. The domain contains two servers named Server1 and Server2. Server1 runs Windows Server 2012 R2. Server2 runs Windows Server 2008 R2 Service Pack 1 (SP1) and has the DHCP Server server role installed.
You need to manage DHCP on Server2 by using the DHCP console on Server1.
What should you do first?
A. From Windows PowerShell on Server2, run Enable-PSRemoting cmdlet.
B. From Windows PowerShell on Server1, run Install-Windows Feature.
C. From Internet Explorer on Server2, download and install Windows Management Framework 3.0.
D. From Windows Firewall with Advanced Security on Server2, create an inbound rule.
Answer: B
Explanation:
When the DHCP role is installed, it appears that the firewall rules are automatically added, so C is not valid (not only that, but either way it is an existing rule that one would need only enable nonetheless, not create a new rule). This means you only need to add the DHCP Manager MMC snap-in which is a Role Administration Tool feature.
So the correct answer must be B.
