NEW QUESTION: 1

What is the minimum number of datasets and storage modes required to support the reports?

- A.** a single imported dataset
- B.** a single DirectQuery dataset
- C.** two DirectQuery datasets
- D.** two imported datasets

Answer: D

Explanation:

Explanation

Scenario: Data and Sources

Data for the reports comes from three sources. Detailed revenue, cost, and expense data comes from an Azure SQL database. Summary balance sheet data comes from Microsoft Dynamics 365 Business Central. The balance sheet data is not related to the profit and loss results, other than they both relate dates.

Monthly revenue and expense projections for the next quarter come from a Microsoft SharePoint Online list.

Quarterly projections relate to the profit and loss results by using the following shared dimensions: date, business unit, department, and product category.

NEW QUESTION: 2

A supervisor in the human resources department has been given additional job duties in the accounting department.

Part of their new duties will be to check the daily balance sheet calculations on spreadsheets that are restricted to the accounting group. In which of the following ways should the account be handled?

- A.** The supervisor should be allowed to have access to the spreadsheet files, and their membership in the human resources group should be terminated.
- B.** The supervisor should only maintain membership in the human resources group.
- C.** The supervisor should be removed from the human resources group and added to the accounting group.
- D.** The supervisor should be added to the accounting group while maintaining their membership in the human resources group.

Answer: D

Explanation:

You can assign permissions to access resources either to a user or a group. The most efficient way is to assign permissions to a group (group based privileges). By assigning the human

resources supervisor's user account to the group means the supervisor will inherit the permissions of that group, and allow him to carry out the new duties.

Because the new duties are being added to his normal duties, maintaining membership in the human resources group will allow the supervisor to continue performing his normal duties.

Incorrect Answers:

A. Because the new duties are being added to his normal duties, terminating the supervisor's membership in the human resources group will prevent the supervisor from carrying out his normal duties as he will no longer have the required permissions.

B. Because the new duties are being added to his normal duties, removing the supervisor from the human resources group will prevent the supervisor from carrying out his normal duties as he will no longer have the required permissions.

D. Maintaining the supervisor's membership in the human resources group only, will prevent the supervisor from carrying out his additional duties in the accounting department as the supervisor will not have the required permissions.
