If you failed the exam with our 700-760 practice materials, we promise to give back full refund, Now, there are many people preparing for the 700-760 test, and most of them meet with difficulties.

Free demos of our 700-760 study guide are understandable materials as well as the newest information for your practice, Many people fail the exam 700-760 and the exam cost is quite high.

### **NEW QUESTION: 1**

Which type of address translation supports the initiation of communications bidirectionally?

- A.** multi-session PAT
- B.** static NAT
- C.** dynamic NAT
- D.** dynamic PAT

**Answer: C**

### **NEW QUESTION: 2**

When an incoming PSTN call arrives at an MGCP gateway, how does the calling number get normalized to a global E.164 number with the + prefix in Cisco Unified Communications Manager?

- A.** Normalization is done using the gateway incoming called party prefixes based on number type.
- B.** Normalization is achieved by local route group that is assigned to the MGCP gateway.
- C.** Normalization is done using route patterns.
- D.** Normalization is done using translation patterns.
- E.** Normalization is done using the gateway incoming calling party prefixes based on number type.

**Answer: E**

Explanation:

Configuring calling party normalization alleviates issues with toll bypass where the call is routed to multiple locations over the IP WAN. In addition, it allows Cisco Unified Communications Manager to distinguish the origin of the call to globalize or localize the calling party number for the phone user.
