Our 700-821 study materials are simplified and compiled by many experts over many years according to the examination outline of the calendar year and industry trends.

### **NEW QUESTION: 1**

You are considering whether HP MSA 2040 Storage meets a customer's needs. What are the benefits and consideration of this solution?

- A.** It provides a tier 1 storage solution, but the company might eventually outgrow it.
- B.** It is easy to implement and manage, but does not scale as well as other HP solutions.
- C.** It is a good mid-sized storage array, but requires a blade infrastructure.
- D.** It is very affordable, but its performance depends on the hardware of the server on which it is installed.

**Answer: D**

Explanation:

### **NEW QUESTION: 2**

You want to migrate your database from on-premises to OCI with no downtime. Which method would you use?

- A.** Data Pump
- B.** Golden Gate
- C.** SQL Developer
- D.** Data Guard

**Answer: D**

Explanation:

The Oracle Zero Downtime Migration tool follows a simple single button approach, is fully MAA-compliant and scales to your fleet needs. Oracle ZDM leverages Oracle Data Guard in order to provide an automated migration for your on-premises database to the Oracle Cloud; all of this, with a five step process that analyzes both the source and target, prepares both databases, migrates your data, provides monitoring and then a controlled switchover of the application to your newly migrated database in the Oracle Cloud.

### **NEW QUESTION: 3**

Your network contains an Active Directory domain named contoso.com. The domain contains four servers on a test network. The servers are configured as shown in the following table.

Server1 uses the storage shown in the following table.

- ----

You perform the following tasks:

On Server2, you create an advanced SMB share named Share2A and an applications SMB share named Share2B.

On Server3, you create an advanced SMB share named Share3.

On Server4, you create an applications SMB share named Share4.

You add Server3 and Server4 to a new failover cluster named Clus1.

On Clus1, you configure the File Server for general use role, you create a quick SMB share named Share5A, and then you create an applications SMB share named Share5B.

You plan to create a failover cluster of two virtual machines hosted on Server1. The clustered virtual machines will use shared .vhdx files.

You need to recommend a location to store the shared .vhdx files.

Where should you recommend placing the virtual hard disk (VHD)?

- A. \Server2Share2B
- B. \Clus1Share5B
- C. \Server3Share3
- D. \Server4Share4

**Answer: B**
