NEW QUESTION: 1

Click the Exhibit button.

A network administrator receives complaints that the application voicecube is timing out after being idle for 30 minutes. Referring to the exhibit, what is a resolution?

A. [edit]

[\[email protected\]](#)# set applications application voicecube destination-port 5060

B. [edit]

[\[email protected\]](#)# set applications application voicecube inactivity-timeout never

C. [edit]

[\[email protected\]](#)# set applications application voicecube inactivity-timeout 2

D. [edit]

[\[email protected\]](#)# set security policies from-zone trust to-zone trust policy intrazone then timeout never

Answer: B

NEW QUESTION: 2

Which of the following commands are used to terminate a transaction?

Each correct answer represents a complete solution. Choose all that apply.

A. ROLLBACK

B. DELETE

C. TRUNCATE

D. COMMIT

Answer: A,C,D

Explanation:

The COMMIT, ROLLBACK, and TRUNCATE commands are used to terminate a

transaction. While the first two do so explicitly, TRUNCATE does it implicitly. Answer B is incorrect. The DELETE statement is a Data Manipulation Language (DML) statement that is used to delete records from a table, based on the condition specified in the WHERE clause. If the WHERE clause is omitted, all records in the table are deleted. The DELETE statement can be rolled back.

Syntax:

```
DELETE [FROM] TableName  
[WHERE condition];
```

NEW QUESTION: 3

You are a desktop administrator for an enterprise organization.

A user applies a device update from the manufacturer, and now the computer is displaying error messages.

The user has critical documents on the computer that need to be preserved.

You need to restore the computer to an operating state and preserve applications and data.

What should you do?

- A.** Perform a System Image Recovery.
- B.** Boot Windows by using the Last Known Good Configuration.
- C.** Perform a re-installation of Windows.
- D.** Restore Windows by using the most recent System Restore point.

Answer: D
