When you are waiting someone or taking a bus, you can make most of your time to remember the ACE-BigData1 test study material.

NEW QUESTION: 1

Refer to the exhibit.

The MAC address table is shown in its entirety. The Ethernet frame that is shown arrives at the switch.

What two operations will the switch perform when it receives this frame? (Choose two.)

- A. The frame will be forwarded out of all the active switch ports except for port fa0/0.
- B. The switch will not forward a frame with this destination MAC address.
- C. The frame will be forwarded out of all the ports on the switch.
- D. The MAC address of ffff.ffff.ffff will be added to the MAC address table.
- E. The frame will be forwarded out of fa0/0 and fa0/1 only.
- F. The MAC address of 0000.00aa.aaaa will be added to the MAC Address Table.

Answer: A,F

Explanation:

If the switch already has the MAC address in its table for the destination, it will forward the frame directly to the destination port. If it was not already in its MAC table, then they frame would have been flooded out all ports except for the port that it came from.

NEW QUESTION: 2

- A. Remove access-group 102 out from interface s0/0/0 and add access-group 114 in
- B. Remove access-group 106 in from interface fa0/0 and add access-group 104 in.
- C. Remove access-group 106 in from interface fa0/0 and add access-group 115 in.
- D. Change the ip access-group command on fa0/0 from "in" to "out".
- E. Correctly assign an IP address to interface fa0/1.

Answer: B

Explanation:

Let's have a look at the access list 104:

The question does not ask about ftp traffic so we don't care about the two first lines. The 3rd line denies all telnet traffic and the 4th line allows icmp traffic to be sent (ping). Remember that the access list 104 is applied on the inbound direction so the 5th line "access-list 104 deny icmp any any echo-reply" will not affect our icmp traffic because the "echo-reply" message will be sent over the outbound direction.

NEW QUESTION: 3

You need to allow others to access your Windows 7 computer by using the Remote Desktop connection.

What should you do?

- A. Click Turn on network discovery in Network and Sharing Center.
- B. Start the Remote Desktop Connection client in Accessories.
- C. Enable Remote Desktop Connections in System Properties.
- D. Set the security level to medium in Internet Options.

Answer: C

NEW QUESTION: 4

Cisco Finesse supports the use of custom call variable layouts.

How does the agent desktop determine which layout to use?

- A. The layout is associated to the desktop layout under Team Resources.
- B. The layout is associated to the CSQ definition.
- C. The layout is associated to the team under Team Resources.
- D. The name of the layout is passed to the agent desktop via a keyword variable that is named user layout.

Answer: D
