**Answer: B,C,D**

**NEW QUESTION: 4**

A user has set the IAM policy where it denies all requests if a request is not from IP 10.10.10.1/32. The other policy says allow all requests between 5 PM to 7 PM.

What will happen when a user is requesting access from IP 55.109.10.12/32 at 6 PM?

- A. IAM will throw an error for policy conflict
- B. It will deny access
- C. It will allow access
- D. It is not possible to set a policy based on the time or IP

**Answer: B**

Explanation:

Explanation/Reference:

Explanation:

When a request is made, the AWS IAM policy decides whether a given request should be allowed or denied. The evaluation logic follows these rules:

By default, all requests are denied. (In general, requests made using the account credentials for resources in the account are always allowed.) An explicit allow policy overrides this default. An explicit deny policy overrides any allows.

In this case since there are explicit deny and explicit allow statements. Thus, the request will be denied since deny overrides allow.
