There are three different versions of our AD5-E113 exam questions: the PDF, Software and APP online, Other workers are also dedicated to their jobs, If you want to have a general review of what you have learned, you can choose us.

NEW QUESTION: 1

What term best describes accurate record keeping, a safe exercise environment, and proper supervision?

- A. Legal management
- B. Help management
- C. Assistance management
- D. Risk management

Answer: D

NEW QUESTION: 2

You work as a project manager for Bluewell Inc. You have identified a project risk. You have then implemented the risk action plan and it turn out to be non-effective. What type of plan you should implement in such case?

A. Risk response plan

B. Explanation:

A risk fallback plan is a proper plan devised to identify definite action to be taken if the risk action plan (Risk Mitigation Plan) is not helpful. Fallback plan is important in Risk Response Planning. If the contingency plan for a risk is not successful, then the project team implements the fallback plan. Fall-back planning is intended for a known and specific activity that may perhaps fail to produce desired outcome. It is related with technical procedures and with the responsibility of the technical lead.

C. Risk fallback plan

D. Risk mitigation

E. Risk avoidance

Answer: C

Explanation:

A, and C are incorrect. These all choices itself comes under risk action plan. As in the described scenario, risk action plan is not turned to be effective, these should not be implemented again.

NEW QUESTION: 3

A network engineer must set the load balance method on an existing port channel. Which action must be done to apply a new load balancing method?

- A. Upgrade the PFC to support the latest load balancing methods.
- B. Configure the new load balancing method using port-channel load-balance.
- C. Ensure that IP CEF is enabled globally to support all load balancing methods.
- D. Adjust the switch SDM back to "default".

Answer: B

Explanation:

Example: EtherChannel balances the traffic load across the links in a channel through the reduction of part of the binary pattern that the addresses in the frame form to a numerical value that selects one of the links in the channel. EtherChannel load balancing can use MAC addresses or IP addresses, source or destination addresses, or both source and destination addresses. The mode applies to all EtherChannels that are configured on the switch. You configure the load balancing and forwarding method with use of the portchannel load-balance {dst-ip | dst-mac | src-dst-ip | src-dst-mac | src-ip | src-mac}

global configuration command. Reference:

<http://www.cisco.com/c/en/us/support/docs/lan-switching/etherchannel/120234.html>

NEW QUESTION: 4

How can the use of USB drives be identified?

- A. Enable plug and play device rule to monitor USB plugs
- B. Enable removable file storage access to monitor USB plugs
- C. Enable fixed hard drive rule to monitor USB plugs
- D. Enable unmanageable device classes to monitor USB plugs

Answer: A
