NEW QUESTION: 4

- A. Option D
- B. Option A
- C. Option B
- D. Option C

Answer: C

Explanation:

Explanation

Disconnected operation mode is enabled by default and allows App-V applications to be available to users even when the laptops are offline. We need to disable Disconnected operation mode to prevent offline access.

The disconnected operation mode settings-accessible by right-clicking the Application Virtualization node, selecting Properties, and clicking the Connectivity tab-enables the Application Virtualization Desktop Client or Client for Remote Desktop Services (formerly Terminal Services) to run applications that are stored in the file system cache of the client when the client is unable to connect to the Application Virtualization Management Server.
