NEW QUESTION: 1

A customer wants to use Cloud Identity as their primary IdP. The customer wants to use other non-GCP SaaS products for CRM, messaging, and customer ticketing management. The customer also wants to improve employee experience with Single Sign-On (SSO) capabilities to securely access GCP and non-GCP applications. Only authorized individuals should be able to access these third-party applications. What action should the customer take to meet these requirements?

- A. Configure third-party applications to federate authentication and authorization to the GCP IdP.
- B. Remove the employee from Cloud Identity, set the correct license for the individuals, and resync them to Cloud Identity for the changes to take effect.
- C. Remove the individuals from the third-party applications, add the license to Cloud Identity, and resync the individuals back to the third-party applications.
- D. Copy user personas from Cloud Identity to all third-party applications for the domain.

Answer: A

Explanation:

A is not correct because Users should continue to be in Cloud Identity as central source of truth.

B is correct because cloud identity will serve as SAML auth for third party apps.

C is not correct because it doesn't help to automate user provisioning.

D is not correct because it doesn't help to automate user provisioning and deprovisioning on a continual basis.

NEW QUESTION: 2

You plan to move several apps that handle critical line-of-business (LOB) services to Azure. Appropriate personnel must be notified if any critical resources become degraded or unavailable.

You need to design a monitoring and notification strategy that can handle up to 100 notifications per hour.

Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Answer:

Explanation:

Explanation

Step 1: Create a resource group containing the critical resources.

In step 2 the action group should be created within this Resource Group.

Step 2: Create an action group for alerts to email addresses.

You configure an action to notify a person by email or SMS, they receive a confirmation indicating they have been added to the action group.

The rate limit thresholds are:

SMS: No more than 1 SMS every 5 minutes.

Voice: No more than 1 Voice call every 5 minutes.

Email: No more than 100 emails in an hour.

Step 3: Monitor service health for incidents and action required notifications An action group is a collection of notification preferences defined by the owner of an Azure subscription.

Azure Monitor and Service Health alerts use action groups to notify users that an alert has been triggered.
