NEW QUESTION: 2

You need to recommend changes to the Active Directory site topology to support on the company's planned changes.

What should you include in the recommendation?

- A. A new subnet
- B. A new site
- C. A new site link bridge
- D. A new site link

Answer: A

Explanation:

Sites overview Sites in AD DS represent the physical structure, or topology, of your network. AD DS uses network topology information, which is stored in the directory as site, subnet, and site link objects, to build the most efficient replication topology. The replication topology itself consists of the set of connection objects that enable inbound replication from a source domain controller to the destination domain controller that stores the connection object. The

Knowledge Consistency Checker (KCC) creates these connection objects automatically on each domain controller. <http://technet.microsoft.com/en-us/library/cc754697.aspx>
