So with the help of the renewal of the C-S4CAM-2105 exam braindumps, it is a piece of cake for you to succeed in passing this exam.

#### **NEW QUESTION: 1**

Which of the following must a user implement if they want to send a secret message to a coworker by embedding it within an image?

- A. Digital signature
- B. Hashing
- C. Steganography
- D. Transport encryption

**Answer: C**

Explanation:

Steganography is the process of concealing a file, message, image, or video within another file, message, image, or video.

Note: The advantage of steganography over cryptography alone is that the intended secret message does not attract attention to itself as an object of scrutiny. Plainly visible encrypted messages, no matter how unbreakable will arouse interest, and may in themselves be incriminating in countries where encryption is illegal. Thus, whereas cryptography is the practice of protecting the contents of a message alone, steganography is concerned with concealing the fact that a secret message is being sent, as well as concealing the contents of the message.

#### **NEW QUESTION: 2**

Which methods can be used to reduce the number of rows processed by BigQuery?

- A. Splitting tables into multiple tables; putting data in partitions
- B. Splitting tables into multiple tables; using the LIMIT clause
- C. Splitting tables into multiple tables; putting data in partitions; using the LIMIT clause

**D.** Putting data in partitions; using the LIMIT clause

**Answer: A**

Explanation:

If you split a table into multiple tables (such as one table for each day), then you can limit your query to the data in specific tables (such as for particular days). A better method is to use a partitioned table, as long as your data can be separated by the day. If you use the LIMIT clause, BigQuery will still process the entire table.

### **NEW QUESTION: 3**

A storage administrator wants to enable NPV on a Fibre Channel edge switch. Which configuration is supported in this mode?

- A.** Dynamic Port VSAN Membership
- B.** Cisco Fabric Services distribution over Fibre Channel
- C.** E Port connectivity to the core switch
- D.** local switching of east-west traffic

**Answer: D**

### **NEW QUESTION: 4**

Your customer would like the Employee Class field from the employee's Job Information portlet to be available in performance forms.

Which section of the Succession data model must you configure to meet this requirement?

Please choose the correct answer.

- A.** <background-element>
- B.** <hris-sync-mappings>
- C.** <hris-element>
- D.** <standard-element>

**Answer: C**
