100% Pass Quiz High-quality C-S4CS-2105 - SAP Certified Application Associate - SAP S/4HANA Cloud (public) - Sales Implementation Test Topics Pdf

Our free demo of C-S4CS-2105 training material provides you with the free renewal in one year so that you can keep track of the latest points happening in the world.

Our online workers will solve your problem immediately after receiving your questions, Our C-S4CS-2105 VCE dumps questions are designed with the most professional questions and answers about the core of C-S4CS-2105 test prep questions and the best real exam scenario simulations, in which ways that you can master the core knowledge in a short time by considering yourself sitting in the examination hall as in the real C-S4CS-2105 study materials.

We have three versions for each exam, Our C-S4CS-2105 practical material is a learning tool that produces a higher yield than the other, There are so many advantages of our C-S4CS-2105 actual exam, and you are welcome to have a try!

You have to get relevant internet technological qualifications C-S4CS-2105 in order to enhance your advantages and make you stick out from the crowd, Besides, SAP C-S4CS-2105 training study material is edited by senior professional 350-201 Actual Test Answers with rich hands-on experience and several years' efforts, and it has reliable accuracy and good application.

For example, if you are a college student, you can study and use online resources through the student column of our C-S4CS-2105 learning guide, and you can choose to study in your spare time.

C-S4CS-2105 Braindumps, We are never complacent about our achievements, so all content of our C-S4CS-2105 exam questions are strictly researched by proficient experts who absolutely in compliance with syllabus of this exam.

Here our SAP Certified Application Associate - SAP S/4HANA Cloud (public) - Sales Implementation exam study material won't let out any of your information, C-S4CS-2105 latest vce dumps can be your first step and help you pass exam 100%.

NEW QUESTION: 1
You need to recommend a solution to meet the database retention requirement. What should you recommend?
A. Use automatic Azure SQL Database backups.
B. Configure a long-term retention policy for the database.
C. Configure geo replication of the database.
D. Configure Azure Site Recovery.
Answer: B
Explanation:
Topic 2, Case Study
Overview
Contoso,Ltd is a US-base finance service company that has a main office New York and an office in San Francisco.
Payment Processing Query System
Contoso hosts a business critical payment processing system in its New York data center. The system has three tiers a front-end web app a middle -tier API and a back end data store implemented as a Microsoft SQL Server 2014 database All servers run Windows Server 2012 R2. The front -end and middle net components are hosted by using Microsoft Internet Inform-non Services (IK) The application rode is written in C# and middle- tier API uses the Entity framework to communicate the SQL Server database. Maintenance of the database e

performed by using SQL Server Ago- The database is currently J IB and is not expected to grow beyond 3 TB.

The payment processing system has the following compliance related requirement

* Encrypt data in transit and at test. Only the front-end and middle-tier components must be able to access the encryption keys that protect the date store.

* Keep backups of the two separate physical locations that are at last 200 miles apart and can be restored for op to seven years.

* Support blocking inbound and outbound traffic based on the source IP address, the description IP address, and the port number

* Collect Windows security logs from all the middle-tier servers and retain the log for a period of seven years,

* Inspect inbound and outbound traffic from the from-end tier by using highly available network appliances.

* Only allow all access to all the tiers from the internal network of Contoso.

Tape backups ate configured by using an on-premises deployment or Microsoft System Center Data protection Manager (DPMX and then shaped ofsite for long term storage Historical Transaction Query System Contoso recently migrate a business-Critical workload to Azure. The workload contains a NET web server for querying the historical transaction data residing in azure Table Storage. The NET service is accessible from a client app that was developed in-house and on the client computer in the New Your office. The data in the storage is 50 GB and is not except to increase.

Information Security Requirement

The IT security team wants to ensure that identity management n performed by using Active Directory. Password hashes must be stored on premises only.

Access to all business-critical systems must rely on Active Directory credentials. Any suspicious authentication attempts must trigger multi-factor authentication prompt automatically Legitimate users must be able to authenticate successfully by using multi-factor authentication.

Planned Changes

Contoso plans to implement the following changes:

* Migrate the payment processing system to Azure.

* Migrate the historical transaction data to Azure Cosmos DB to address the performance issues.

Migration Requirements

Contoso identifies the following general migration requirements:

Infrastructure services must remain available if a region or a data center fails. Failover must occur without any administrative intervention

* Whenever possible. Azure managed serves must be used to management overhead

* Whenever possible, costs must be minimized.

Contoso identifies the following requirements for the payment processing system:

* If a data center fails, ensure that the payment processing system remains available without any administrative intervention. The middle-tier and the web front end must continue to operate without any additional configurations-

* If that the number of compute nodes of the from -end and the middle tiers of the payment processing system can increase or decrease automatically based on CPU utilization.

* Ensure that each tier of the payment processing system is subject to a Service level Agreement (SLA) of 9959 percent availability

* Minimize the effort required to modify the middle tier API and the back-end tier of the payment processing system.

* Generate alerts when unauthorized login attempts occur on the middle-tier virtual machines.

* Insure that the payment processing system preserves its current compliance status.

* Host the middle tier of the payment processing system on a virtual machine.

Contoso identifies the following requirements for the historical transaction query system:

* Minimize the use of on-premises infrastructure service.
* Minimize the effort required to modify the .NET web service querying Azure Cosmos DB.
* If a region fails, ensure that the historical transaction query system remains available without any administrative intervention.
Current Issue
The Contoso IT team discovers poor performance of the historical transaction query as the queries frequently cause table scans.
Information Security Requirements
The IT security team wants to ensure that identity management is performed by using Active Directory. Password hashes must be stored on-premises only.
Access to all business-critical systems must rely on Active Directory credentials. Any suspicious authentication attempts must trigger a multi-factor authentication prompt automatically. legitimate users must be able to authenticate successfully by using multi-factor authentication.

NEW QUESTION: 2
When a client station sends a broadcast probe request frame with a wildcard SSID, how do APs respond?
A. After waiting a SIFS, all APs reply at the same time with a probe response.
B. Each AP responds in turn after preparing a probe response and winning contention.
C. Each AP checks with the DHCP server to see if it can respond and then acts accordingly.
D. For each probe request frame, only one AP may reply with a probe response.
Answer: B

NEW QUESTION: 3
What are two driving factors for implementing an open, yet secure, network solution? (Choose two.)
A. the need for lower TCO
B. the need to access the Internet and cloud-based services from within the enterprise
C. the need to access assets that are located within the enterprise from remote locations
D. the need to access assets within the enterprise from office desks
E. the need for less downtime
Answer: B,C
