NEW QUESTION: 1
James is a network administrator working at a student loan company in Minnesota. This company processes over 20,000 student loans a year from colleges all over the state. Most communication between the company schools, and lenders is carried out through emails. Much of the email communication used at his company contains sensitive information such as social security numbers. For this reason, James wants to utilize email encryption. Since a server-based PKI is not an option for him, he is looking for a low/no cost solution to encrypt emails. What should James use?
A. James could use PGP as a free option for encrypting the company's emails.
B. James should utilize the free OTP software package.
C. James can use MD5 algorithm to encrypt all the emails
D. James can enforce mandatory HTTPS in the email clients to encrypt emails
Answer: A
