NEW QUESTION: 1

You have an Azure subscription that contains an Azure Directory (Azure AD) tenant named contoso.com. The tenant is synced to the on-premises Active Directory domain. The domain contains the users shown in the following table.

You enable self-service password reset (SSPR) for all users and configure SSPR to have the following authentication methods:

- * Number of methods required to reset: 2
- * Methods available to users: Mobile phone, Security questions
- * Number of questions required to register: 3
- * Number of questions required to reset: 3

You select the following security questions:

- * What is your favorite food?
- * In what city was your first job?
- * What was the name of your first pet?

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: No

Administrator accounts are special accounts with elevated permissions. To secure them, the following restrictions apply to changing passwords of administrators:

On-premises enterprise administrators or domain administrators cannot reset their password through Self-service password reset (SSPR). They can only change their password in their on-premises environment. Thus, we recommend not syncing on-prem AD admin accounts to Azure AD.

An administrator cannot use secret Questions & Answers as a method to reset password.

Box 2: Yes

Self-service password reset (SSPR) is an Azure Active Directory feature that enables employees to reset their passwords without needing to contact IT staff.

Box 3: Yes

NEW QUESTION: 2

Click the Exhibit button.

You have configured your SRX Series device to receive authentication information from a JIMS server. However, the SRX is not receiving any authentication information.

Referring to the exhibit, how would you solve the problem?

A. Change the SRX configuration to connect to the JIMS server using HTTP.

The device obtains an access token after it authenticates to the JIMS server. The device must use this token to query JIMS for user information. Token is used for the user identity information after if authentication is successful and in this case it is stuck in the authentication.

Following is the link.
