必要な手順を正しい順序で指定します。
A. 1, 2
B. 1, 2, 4
C. 1, 4, 3, 2
D. 1, 4, 3
Answer: A

NEW QUESTION: 2
During a systems development audit, software developers indicated that all programs were moved from the development environment to the production environment and then tested in the production environment. What should the auditor recommend?
I. Implement a test environment to ensure that testing is not performed in the production environment.
II. Require developers to move modified programs from the development environment to the test environment and from the test environment to the production environment.
III.

Eliminate access by developers to the production environment.
A. III only
B. I only
C. I and II only
D. I and III only
Answer: D

NEW QUESTION: 3
You have just graduated from college' now you are serving the internship as the software developer in an international company. According to the requirements of the company CIO, you are creating a custom user control which will be used on 10 Web Forms for an ASP.NET Web site. Users can register and log on to a personalized experience by using the ASP.NET Web site. The custom user control uses two TextBox controls and two Button controls. You must make sure that only when users are not logged on to the Web site, the controls are visible. Besides this, you must reduce the amount of effort in developing and maintaining the Web site. So what should you do? (choose more than one)
A. In the Page_Load method of the Web Form, add a code segment to set the visibility of the TextBox and Button controls where the control is added.
B. In the Page_Load method of the custom user control, add a code segment to set the visibility of the TextBox and Button controls.
C. You should add the OnClick event handler for the Login button to the code used in the custom user control.
D. You should add the OnClick event handler for the Login button to the code used in the Web Form where the control is added.
Answer: B,C

NEW QUESTION: 4
You are the production supervisor at a manufacturing company. You are in the process of configuring the production control module and its parameters.
A company plans to use manufacturing execution. Bill of materials (BOM) item consumption must be generated when items are reported at the operation level.
You need to configure the Manufacturing execution production order defaults form to allow for back flushing on operations.
How should you set up Automatic BOM consumption? To answer, drag the appropriate setting to the correct targets. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:
Explanation:

Explanation
