NEW QUESTION: 2

Company A is a nation-wide leader in commercial demolition. Having just celebrated its 100th year of operations, the company decided to begin doing work internationally. The current system used for reporting company finances is unable to keep pace with the potential demands of doing work in geographically dispersed locations. Therefore, the company decided to replace its client-based Profit & Loss (P&L) reporting system with a more robust, web-based system. This will ensure transparency across the organization and enable better decision making.

The business analyst (BA) at Company A has recently completed several rounds of elicitation to determine the requirements for the new, web-based system. Over 1250 requirements were elicited. An initial Requirements Traceability Matrix (RTM) has been drafted, and a subset of the RTM can be seen below:

The BA will create a Data Model to meet which requirement?

- A. Requirement ID NFP0002

- B. Requirement ID FE10001
- C. Requirement ID F-R0003
- D. Requirement ID F-R0002

Answer: A

NEW QUESTION: 3

Scenario

Additional Information

Product Description

Quality notes from the Daily Log

The Director of Information Technology Division (DIT) has been asked to ensure that any changes to the outsourced staff employment contracts adhere to employment law. The DIT will review future job descriptions of the transferred staff before the final contract is signed with the selected service provider.

The service level agreement between MFH and the selected service provider will specify the type and quality of service required. The selected service provider must follow the industry standards for providing outsourced services.

MFH has a quality management system which contains a document control procedure for all its documentation, however this does not include change management.

All project documents will be subject to a quality review. Nominated products will require a formal approval record signed-off by the quality review chair.

Extract from the draft Quality Management Strategy (may contain errors) Introduction

1. This document defines the approach to be taken to achieve the required quality levels during the project.

2. The Project Board will have overall responsibility for the Quality Management Strategy.

3. Project Assurance will provide assurance on the implementation of the Quality Management Strategy.

Quality management procedure - Quality standards

4. The selected service provider will operate to industry standards for providing outsourced services.

5. MFH document standards will be used.

Records

6. A Quality Register will be maintained to record the planned quality events and the actual results from the quality activities.

7. Configuration Item Records will be maintained for each product to describe its status, version and variant.

8. Approval records for products that require them will be stored in the quality database.

Roles and responsibilities

9. The DIT will check that the employment contracts for outsourced staff adhere to employment law.

10. Team Managers will provide details of quality checks that have been carried out.

11. Team Managers will ensure that the Quality Register is updated with the names of team members who are involved in the review process.

12. The Senior User will review the Product Descriptions of the products to be produced by the selected service provider to ensure that they can be achieved.

Which is a correctly defined acceptance criterion for the transferred facilities computer system?

A. No (zero) loss of system functionality.

B. Back-up of data must be kept until the data is no longer needed.

C. Planned periods of shutdowns of the computer system must be kept to a minimum.

D. Must be subject to regular back-ups.

Answer: A

NEW QUESTION: 4

In the Target URL field, specify the URL of your SAP Ariba Supplier Management solutions site. For Example:
