Which actions can a promiscuous IPS take to mitigate an attack? (Choose three.)

- A. Requesting host blocking
- B. Requesting connection blocking
- C. Denying packets
- D. Denying frames
- E. Resetting the TCP connection
- F. Modifying packets

Answer: A,B,E

Explanation:

Promiscuous Mode Event Actions

+ Request block host: This event action will send an ARC request to block the host for a specified time frame, preventing any further communication. This is a severe action that is most appropriate when there is minimal chance of a false alarm or spoofing.

+ Request block connection: This action will send an ARC response to block the specific connection.

This action is appropriate when there is potential for false alarms or spoofing. + Reset TCP connection: This action is TCP specific, and in instances where the attack requires several TCP packets, this can be a successful action.
