Explanation:

Explanation: <http://h20195.www2.hp.com/V2/getpdf.aspx/4AA5-8756ENW.pdf?ver=1.0>

### **NEW QUESTION: 3**

DRAG DROP

You are implementing a user control. The user control is databound to an Items collection through the DataContext property. Each item in the collection contains a Name property and a RemoveItem property.

The user control must display a two-column list of elements that has the name of the databound item on the left and a button labeled Remove on the right.

You need to implement the content of the user control.

How should you complete the relevant code? (To answer, drag the appropriate code segments to the correct locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

**Answer:**

Explanation:

#### **NEW QUESTION: 4**

After a recent corporate merger, the two companies need to merge their P8 environments into a single P8 repository using a single LDAP repository. To accomplish this task, FileNet Deployment Manager will be used.

What steps are required to make sure that the LDAP user information is remapped from the "source" LDAP repository to the "destination" LDAP repository.

**A.** When creating the export manifest, select the userids to remap when creating the export manifest.

**B.** Mapping LDAP users from different LDAP repositories is not a feature of FileNet Deployment Manager.

**C.** In the Source-Destination Pairs, right click on "Object Store Map" and select "Map Data".

**D.** Create the security principal half maps followed by a right click on "Security Principal Map" and selecting "Map Data" from within Source-Destination Pairs.

**Answer: D**
