NEW QUESTION: 1

One of the properties of behavior is

- A. repeatability.
- B. effectiveness.
- C. universality.
- D. size.

Answer: A

NEW QUESTION: 2

Tom works as the project manager for BlueWell Inc. He spends the majority of his time communicating with team members and the project stakeholders. Various communication skills are involved in the communication processes. Which communication skills are involved in this process? Each correct answer represents a part of the solution. Choose all that apply.

- A. Vertical and Horizontal
- B. Confronting and problem solving
- C. Internal and External
- D. Formal and Informal

Answer: A,C,D

Explanation:

These are some communication activities that Tom uses to communicate with the team and the stakeholders. Communications skills are part of general management skills and are used to exchange information. Communication has many dimensions: Written and oral, listening, and speaking Internal (within the project) and external (customer, the media, the public) Formal (reports, briefings) and informal (memos, ad hoc conversations) Vertical (up and down the organization) and horizontal (with peers) Communication is the most important skill that a project manager must possess. It is the single most important characteristic of a top-class project manager. Project managers must communicate well in order to integrate and maximize the performance of team members. Oral and written communications are the backbone of every successful project. During different phases of a project, a project manager requires to communicate through different manners (for example, documentation, meeting updates, etc.) and he must ensure that the information communicated is explicit, clear, and complete. Answer option C is incorrect. It is a technique to resolve conflict that arises while communicating with different parties.

NEW QUESTION: 3

Your company wants to track whether someone is present in a meeting room reserved for a scheduled meeting. There are 1000 meeting rooms across 5 offices on 3 continents. Each room is equipped with a motion sensor that reports its status every second. The data from the motion detector includes only a sensor ID and several different discrete items of information. Analysts will use this data, together with information about account owners and office locations.

Which database type should you use?

- A. Relational
- B. Flat file
- C. NoSQL
- D. Blobstore

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Relational databases were not designed to cope with the scale and agility challenges that face modern applications, nor were they built to take advantage of the commodity storage and processing power available today.

NoSQL fits well for:

Developers are working with applications that create massive volumes of new, rapidly changing data

types - structured, semi-structured, unstructured and polymorphic data.

Incorrect Answers:

D: The Blobstore API allows your application to serve data objects, called blobs, that are much larger than the size allowed for objects in the Datastore service. Blobs are useful for serving large files, such as video or image files, and for allowing users to upload large data files.
