As everyone knows, preparing for an exam is a time-consuming as **CIPP-US Valid Study Plan.pdf** well as energy-consuming course, however, as it is worldly renowned well begun, half done, if you choose to use our CIPP-US test prep materials, you can save most of your time as well CIPP-US as energy since we can assure that you can pass the IT exam and get the IT certification with a minimum of time and effort.

CIPP-US practice materials & CIPP-US guide torrent: Certified Information Privacy Professional/United States (CIPP/US) & CIPP-US study guide

Why to get CIPP-US certification, Many questions of our CIPP-US study materials deserve your careful learning, Because our products will help you solve the problem, it will never let you down if you decide to purchase and practice our CIPP-US latest question.

We build good relationship with a group of customers, many of them will become regular customer after passing CIPP-US exam, they not only give us great comments, but purchase the second or more times later with confidence toward our products, and recommend our CIPP-US test prep materials to people around them who need the exam preparation materials.

Customer service: Errandsolutions cares for its customer, you may need some assistance Test MB-230 Questions Vce in order to get familiarized with the software and other queries, for that purpose, Errandsolutions provides you 24/7 customer services.

If you have anxiety for coming exams and failed many times before with bad score our CIPP-US exam simulation will be your wise option, As the professional provider of exam relatedmaterials in IT certification test, Errandsolutions has been devoted Valid Test HPE6-A71 Vce Free to provide all candidates with the most excellent questions and answers and has helped countless people pass the exam.

Don't worry, neither, we also offer the free update **CIPP-US Valid Study Plan.pdf** for one year, After receiving many users' feedback, we never stop trying to do better, For the trial versions are the free demos which are a small of the CIPP-US exam questions, they are totally free for our customers to download.

they are already convinced that getting a CIPP-US certification can help them look for a better job, Updating periodically, The questions & answers from the CIPP-US valid training material are all valid and accurate, made by the efforts of a professional IT team.

NEW QUESTION: 1
The Information Security Officer (ISO) believes that the company has been targeted by cybercriminals and it is under a cyber attack. Internal services that are normally available to the public via the Internet are inaccessible, and employees in the office are unable to browse the Internet. The senior security engineer starts by reviewing the bandwidth at the border router, and notices that the incoming bandwidth on the router's external interface is maxed out. The security engineer then inspects the following piece of log to try and determine the reason for the downtime, focusing on the company's external router's IP which is
1 28.20.176.19:
1 1:16:22.110343 IP 90.237.31.27.19 > 128.20.176.19.19: UDP, length 1400
1 1:16:22.110351 IP 23.27.112.200.19 > 128.20.176.19.19: UDP, length 1400
1 1:16:22.110358 IP 192.200.132.213.19 > 128.20.176.19.19: UDP, length 1400
1 1:16:22.110402 IP 70.192.2.55.19 > 128.20.176.19.19: UDP, length 1400
1 1:16:22.110406 IP 112.201.7.39.19 > 128.20.176.19.19: UDP, length 1400
Which of the following describes the findings the senior security engineer should report to the ISO and the
BEST solution for service restoration?
A. After the senior engineer used a mirror port to capture the ongoing amplification attack, a BGP sinkhole should be configured to drop traffic at the source networks.
B. After the senior engineer used a packet capture to identify an active Smurf attack, an ACL should be placed on the company's external router to block incoming UDP port 19 traffic.
C. After the senior engineer used a network analyzer to identify an active Fraggle attack, the

company's
ISP should be contacted and instructed to block the malicious packets.
D. After the senior engineer used the above IPS logs to detect the ongoing DDOS attack, an IPS filter should be enabled to block the attack and restore communication.
Answer: C
Explanation:
The exhibit displays logs that are indicative of an active fraggle attack. A Fraggle attack is similar to a smurf attack in that it is a denial of service attack, but the difference is that a fraggle attack makes use of
ICMP and UDP ports 7 and 19. Thus when the senior engineer uses a network analyzer to identify the attack he should contact the company's ISP to block those malicious packets.
Incorrect Answers:
B: The logs are indicative of an ongoing fraggle attack. Even though a fraggle attack id also a DOS attack the best form of action to take would be to ask the ISP to block the malicious packets.
C: Configuring a sinkhole to block a denial of service attack will not address the problem since the type of attack as per the logs indicates a fraggle attack.
D: A smurf attack spoofs the source address with the address of the victim, and then sends it out as a broadcast ping. Each system in the network will then respond, and flood the victim with echo replies.
The logs do not indicate a smurf attack.
