NEW QUESTION: 1

You are to create a requirements specification for an internet banking software. The system shall perform bank credit transfers and therefore receives from the user, among other information, the bank identification code that must be entered by the user and the bank name is no longer required. On which part of your documentation do you most likely work in order to incorporate this change? (Choose two)

- A.** If it is about inputs and outputs of the system, this change has to be worked into the context diagram
- B.** You have to adjust the class model and/or the data model, which describe the structure of the system's input and output data
- C.** As a change in the goals has been communicated, the goals in the specification must be updated
- D.** Nowhere, since this is a detail for the architecture
- E.** In the chapter in which the states of the system are described

Answer: A,C

NEW QUESTION: 2

What can prevent a successful migration with VMotion?

- A.** different CPU clock speeds
- B.** a physical CD-ROM that is connected from the virtual machine
- C.** network cards located in different server slots
- D.** one of the virtual disks that is a mapped SAN LUN

Answer: B

Explanation:

Basic System Administration Guide Migrating Virtual Machines: Migration Wizard Before you begin, disconnect any peripheral devices connected to the virtual machine. If the virtual machine is using a physical device on the source host, that device will not be accessible on the destination host. This is an incompatibility that will prevent use of VMotion. For example, if the

virtual machine is reading from a CD-ROM drive on the source host, it cannot access that drive from the destination host. page 242 Basic Administration Guide

NEW QUESTION: 3
