NEW QUESTION: 1

What command syntax would be used to create a new IES service with a service id of 5 and a customer id of 1000?

- A. configure ies 5 customer 1000 create
- B. configure router ies 5 customer 1000 create
- C. configure service ies 5 customer 1000 create
- D. configure router ies 5 customer 1000

Answer: C

NEW QUESTION: 2

You have a database hosted on SQL Azure.

You are developing a script to create a view that will be used to update the data in a table. The following is the relevant portion of the script. (Line numbers are included for reference only.)

You need to ensure that the view can update the data in the table, except for the data in Column1.

Which code segment should you add at line 06?

- A. WITH VIEW_METADATA
- B. WITH ENCRYPTION
- C. WITH SCHEMABINDING
- D. WITH CHECK OPTION

Answer: D

Explanation:

The question concerning the view that has a clause "WHERE Column1 = 'City1' is wrong. That's not what the CHECK option is made for. Actually you will be able to update ONLY the rows satisfied by that WHERE clause, that is, only the rows with the Column1 being 'City1'.

None of the answers are valid from that question. You need a trigger to achieve that.
