Explanation: Problem

A datastore in a datastore cluster cannot enter maintenance mode. The Entering Maintenance Mode status remains at 1%.

Cause

One or more disks on the datastore cannot be migrated with Storage vMotion. This condition can occur in the following instances.

- Storage DRS is disabled on the disk.
- Storage DRS rules prevent Storage DRS from making migration recommendations for the disk.

Solution

- If Storage DRS is disabled, enable it or determine why it is disabled. See Storage DRS is Disabled on a Virtual Disk for reasons why Storage DRS might be disabled.
- If Storage DRS rules are preventing Storage DRS from making migration recommendations, you can remove or disable particular rules.
 - * In the vSphere Client inventory, right-click the datastore cluster and select Edit Settings.
 - * Select Rules and click the rule.
 - * Click Remove.
 - * Click OK.

■ Alternatively, if Storage DRS rules are preventing Storage DRS from making migration recommendations, you can set the Storage DRS advanced option IgnoreAffinityRulesForMaintenance to 1.

- * In the vSphere Client inventory, right-click the datastore cluster and select Edit Settings.
- * Select SDRS Automation and click Advanced Options.
- * Enter 1 in the Value column for IgnoreAffinityRulesForMaintenance.
- * Click OK.
