### NEW QUESTION: 1

A Scrum Master is keeping a list of open impediments, but it is growing and he/she has been able to resolve only a small portion of the impediments. Which three techniques would be most helpful in this situation?

(Choose three.)

- A. Alerting management to the impediments and their impact.
- B. Prioritizing the list and working on them in order.
- C. Consulting with the Development Team.
- D. Arranging a triage meeting with all project managers.

**Answer: A,B,C**

### NEW QUESTION: 2

You are developing a web application that consumes services from a third-party application. A web worker processes the third-party application requests in the background. A page in the application instantiates the web worker process.

You need to establish two-way communications between the web worker process and the page.

Which two actions will achieve this goal? (Each correct answer presents a complete solution.

Choose two.)

- A. From the main page, use the onmessage event handler of the web worker to capture events.
- B. From the web worker, use the onmessage event handler of the main page to capture events.
- C. From the web worker, use the onconnect event handler of the main page to capture events.
- D. From the main page, use the onconnect event handler of the web worker to capture events.

**Answer: A,B**

Explanation:

\* When `postMessage()` is called from the main page, our worker handles that message by defining an `onmessage` handler for the message event.

\* Server-Sent Events - One Way Messaging

A server-sent event is when a web page automatically gets updates from a server.

Receive Server-Sent Event Notifications

The `EventSource` object is used to receive server-sent event notifications:

Example

```
var source = new EventSource("demo_sse.php");
source.onmessage = function(event) {
document.getElementById("result").innerHTML += event.data + "<br>";
};
```
