The CRT-251 actual questions & answers are refined from the actual exam test, and then compiled and checked by our IT experts, which are the best authoritative and latest study material for your CRT-251 actual exam test.

In the information society, everything is changing rapidly.

#### **NEW QUESTION: 1**

Nexusゲストツール（NGT）をESXiでホストされているVMにインストールする場合、NGT-Controller VMサービスとの通信を許可するには、VMでどのポートを有効にする必要がありますか？

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: B**

#### **NEW QUESTION: 2**

You need to create the ButtonStyleWhite style. Which code segment should you use?

Scenario 2 (Case Study): Background

You are developing a Windows Store app named Picture Sharer. The app will allow users to capture, modify, caption, and share pictures.

Application Structure

The ShareImageButton and GetContactsButton controls use the same foreground color. The foreground color might change in the future.

The following code defines a custom button style named ButtonStyleRed:

Relevant portions of the app files are shown. (Line numbers are included for reference only and include a two-character prefix that denotes the specific file to which they belong.)

Business Requirements

The app must meet the following business requirements:

-Allow users to capture and retrieve pictures, modify pictures by adding a shading effect, and add captions to images.

- Support only Landscape and Landscape-flipped orientations.
- Ensure that users can select and modify images from the PictureChooserPage page.
- Ensure that users can change the magnification of the selected image and resize the image by using pinch and stretch gestures. Scaling should be fluid and precisely controlled by the user. The app must be localized for the French Canadian market.

#### Technical Requirements

The app must meet the following technical requirements:

- Scroll bars must not be visible.
- The CaptionTextBlock and CaptionTextBox controls must appear side by side, without overlapping and on the same line. The CaptionTextBox control should appear to the right of the CaptionTextBlock control.
- The ContactPicker object must be filtered to display only email addresses.
- Minimize the code that is required to implement optical zoom functionality.

You must perform the following tasks:

- Handle the Click event of the GetPictureButton control to switch from the current page to the PictureChooserPage page.
  - After the user selects an image on the PictureChooserPage page, ensure that the app navigates back to the PictureSharerMainPage page.
  - Track the current screen orientation and page size by updating the `_currentViewState`, `_currentHeight`, and `_currentWidth` fields every time the screen orientation or page size changes.
  - Create a style named `ButtonStyleWhite` that inherits all the style settings of the `ButtonStyleRed` style except the border color; the border color must be white. The `ButtonStyleWhite` style must automatically update with any changes that are made to the `ButtonStyleRed` style.
  - Create a resource named `ButtonForegroundColor` to implement the button foreground color so that it can be referenced in XAML by using the following standard syntax:  
`Foreground="{StaticResource ButtonForegroundColor}"`
  - Ensure that the `OnNavigatedTo()` method updates the current picture when a new picture is selected.
  - Change the background for the root Grid element to a vertical gradient that transitions from black at the top to maroon at the bottom. Create a resource named `GridBackgroundGradientBrush` to hold the requested gradient.
- While testing the app, you observe the following results:
- An exception is being thrown in the `GetContactsCompleted` event handler when the retrieved email address is assigned to the `RecipientsTextBlock` control. The exception message states: "The application called an interface that was marshalled for a different thread."
  - When users navigate away from the `PictureSharerMainPage` page, information that was entered in the `CaptionTextBox` control is lost.

- A. Option F
- B. Option C
- C. Option D
- D. Option B
- E. Option E
- F. Option A

**Answer: A**

**NEW QUESTION: 3**

Which folder contains items that tell launchd what to launch when OS X starts up?

- A. /etc/launchd/
- B. /System/Library/LaunchDaemons/
- C. /Library/Extensions/
- D. /var/run/launchd/

**Answer: C**

**NEW QUESTION: 4**

What is the preferred time for completing racking and labeling of equipment for a new implementation?

- A. After the scheduled outage has begun and initial tests have indicated success
- B. At the beginning of the scheduled outage
- C. Before the scheduled outage
- D. At any time between the beginning of the scheduled outage and the point of no return

**Answer: C**
