### NEW QUESTION: 4

HOTSPOT

You have a series of analytic data models and reports that provide insights into the participation rates for sports at different schools. Users enter information about sports and participants into a client application.

The application stores this transactional data in a Microsoft SQL Server database. A SQL Server Integration Services (SSIS) package loads the data into the models.

When users enter data, they do not consistently apply the correct names for the sports. The following table shows examples of the data entry issues.

You need to create a new knowledge base to improve the quality of the sport name data.

How should you configure the knowledge base? To answer, select the appropriate options in the dialog box in the answer area.

Hot Area:

**Answer:**

Explanation:

Explanation/Reference:

Explanation:

Spot 1: Create Knowledge base from: None

Select None if you do not want to base the new knowledge base on an existing knowledge base or data file.
