- E. The client-server architecture is based on query and response messages.

**Answer: A,E**

### NEW QUESTION: 2

If a database is restored from information backed up before the last system image, which of the following is recommended?

- A. The system should be restarted before the last transaction.
- B. The system should be restarted at the first transaction.
- C. The system should be restarted on the last transaction.
- D. The system should be restarted after the last transaction.

**Answer: A**

Explanation:

If a database is restored from information backed up before the last system image, the system should be restarted before the last transaction because the final transaction must be reprocessed.
