Ihr Unternehmen entwickelt eine neue Business Intelligence-Anwendung, die auf Daten in einer Microsoft Azure SQL-Datenbankinstanz zugreift. Alle Objekte in der Instanz haben denselben Eigentümer.

Ein neuer Sicherheitsprinzpal mit dem Namen BI_User erfordert die Berechtigung zum Ausführen gespeicherter Prozeduren in der Datenbank. Die gespeicherten Prozeduren lesen aus Tabellen in der Datenbank und schreiben in diese. Keine der gespeicherten Prozeduren führt IDENTIFY_INSERT-Operationen oder dynamische SQL-Befehle aus.

Der Umfang der Berechtigungen und der Authentifizierung von BI_User sollte auf die Datenbank beschränkt sein. Wenn Sie Berechtigungen erteilen, sollten Sie das Prinzip der geringsten Berechtigungen verwenden.

Sie müssen die erforderlichen Sicherheitsprinzpale erstellen und die entsprechenden Berechtigungen erteilen.

Lösung: Sie führen die folgende Transact-SQL-Anweisung in der Datenbank aus:

Erfüllt die Lösung das Ziel?

A. Ja

B. Nein

Answer: B

Explanation:

Explanation

One method of creating multiple lines of defense around your database is to implement all data access using stored procedures or user-defined functions. You revoke or deny all permissions to underlying objects, such as tables, and grant EXECUTE permissions on stored procedures. This effectively creates a security perimeter around your data and database objects.

Best Practices

Simply writing stored procedures isn't enough to adequately secure your application. You should also consider the following potential security holes.

* Grant EXECUTE permissions on the stored procedures for database roles you want to be able to access the data.

* Revoke or deny all permissions to the underlying tables for all roles and users in the database, including the public role. All users inherit permissions from public. Therefore denying permissions to public means that only owners and sysadmin members have access; all other users will be unable to inherit permissions from membership in other roles.

* Do not add users or roles to the sysadmin or db_owner roles. System administrators and database owners can access all database objects.

NEW QUESTION: 3

The Web Cache Communication Protocol (WCCP) is a content-routing protocol that can facilitate the redirection of traffic flows in real time. Your organization has deployed WCCP to redirect web traffic that traverses their Cisco Adaptive Security Appliances (ASAs) to their Cisco Web Security Appliances (WSAs).

The simulator will provide access to the graphical user interfaces of one Cisco ASA and one Cisco WSA that are participating in a WCCP service. Not all aspects of the GUIs are implemented in the simulator. The options that have been implemented are sufficient to determine the best answer to each of the questions that are presented.

Your task is to examine the details available in the simulated graphical user interfaces and select the best answer.

How many Cisco ASAs and how many Cisco WSAs are participating in the WCCP service?

A. One Cisco ASA or two Cisco ASAs configured as an Active/Standby failover pair, and two Cisco WSAs.

B. One Cisco ASA or two Cisco ASAs configured as an Active/Active failover pair, and two Cisco WSAs.

C. Two Cisco ASAs and one Cisco WSA.

D. One Cisco ASA or two Cisco ASAs configured as an Active/Active failover pair, and one Cisco WSA.

E. Two Cisco ASAs and two Cisco WSAs.

F. One Cisco ASA or two Cisco ASAs configured as an Active/Standby failover pair, and one Cisco WSA.

Answer: F

Explanation:

We can see from the output that the number of routers (ASA's) is 1, so there is a single ASA or an active/ standby pair being used, and 1 Cache Engine. If the ASA's were in a active/active role it would show up as 2 routers.

- A. Friday, September 17th.
- B. Friday, August 6th.
- C. Tuesday, September 21st.
- D. none of the above.

Answer: A

Explanation:

Explanation/Reference:

Explanation: The ex-dividend date is Friday, September 17th in this scenario. It is two business days prior to the date of record, which is Tuesday, September 21st in this example. Saturday is not considered a business day, so the ex-dividend date is the preceding Friday.
