Which three are benefits of VLANs? (Choose three.)

- A. They simplify switch administration.
- B. They increase the size of broadcast domains while decreasing the number of collision domains.
- C. They allow logical grouping of users by function.
- D. They increase the number of broadcast domains while decreasing the size of the broadcast domains.
- E. They can enhance network security.
- F. They increase the size of collision domains.

Answer: C,D,E

Explanation:

Explanation

Explanation

When using VLAN the number and size of collision domains remain the same -> VLANs allow to group users by function, not by location or geography -> .

VLANs help minimize the incorrect configuration of VLANs so it enhances the security of the network -> .

VLAN increases the size of broadcast domains but does not decrease the number of collision domains -> VLANs increase the number of broadcast domains while decreasing the size of the broadcast domains which increase the utilization of the links. It is also a big advantage of VLAN -> .

VLANs are useful but they are more complex and need more administration ->
