You are an IT intern for a law firm. The firm is evaluating the use of Microsoft Intune to manage the firm's computing devices. Which two tasks can be performed by using Intune? Choose two.

- A. managing Windows servers
- B. deploying a Windows operating system
- C. managing Android devices
- D. deploying software updates

**Answer: C,D**

Explanation:

Explanation

B: When new updates are available from Microsoft Update, or you have created a third-party update, and they are applicable to your managed computers, a notification is displayed on the Overview page of the Updates workspace. After you click this notification link, you can then perform various operations like viewing more information about the update, approving or declining the update, and viewing the computers that will install the update if it is approved.

C: Intune provides secure management of personal and corporate-owned devices across the most popular platforms, including Windows, Windows Phone, iOS, and Android.
