Explanation

Refer AWS documentation - SAM Gradual Code Deployment

If you use AWS SAM to create your serverless application, it comes built-in with AWS CodeDeploy to help ensure safe Lambda deployments. With just a few lines of configuration, AWS SAM does the following for you:

- * Deploys new versions of your Lambda function, and automatically creates aliases that point to the new version.
- * Gradually shifts customer traffic to the new version until you are satisfied that it's working as expected, or you roll back the update.
- * Defines pre-traffic and post-traffic test functions to verify that the newly deployed code is configured correctly and your application operates as expected.
- * Rolls back the deployment if CloudWatch alarms are triggered.

NEW QUESTION: 4

Under the alternative funding method used by the Flair Company, Flair assumes financial responsibility for paying claims up to a specified level and deposits the funds necessary to pay these claims into a bank account that belongs to Flair. However, an insurer, which acts as an agent of Flair, makes the actual payment of claims from this account. When claims exceed the specified level, the insurer pays the balance from its own funds. No state premium tax is levied on the amounts that Flair deposits into this bank account.

From the following answer choices, choose the name of the alternative funding method described.

A. Retrospective-rating arrangement

B. Reserve-reduction arrangement

C. Minimum-premium plan

D. Premium-delay arrangement

Answer: C
