Comprehensive questions and answers about Huawei H12-111_V2.5 exam.

NEW QUESTION: 1

HOTSPOT

Your company has a main office and a branch office. The two offices connect to each other by using a WAN link.

Your network contains an Active Directory forest named contoso.com. The forest contains a domain controller named DC1. All of the domain controllers are located in the main office.

You install a read-only domain controller (RODC) named RODC1 in the branch office.

You create a user account for a new user named User1. You add User1 to the Allowed RODC Password Replication Group. User1 starts work on Monday.

You are notified that the WAN link will be down for maintenance on Monday.

You need to ensure that User1 can log on in the branch office site on Monday.

Which command should you run? To answer, select the appropriate options in the answer area.

Answer:

Explanation:

Explanation:

- D. `@max-width="800px"`

Answer: C

NEW QUESTION: 4

You are requested to design a solution to handle a fallout scenario while communicating with an inventory system for resource allocation because there are no available ports for a product that was purchased.

Identify a solution that would address this condition.

- A. using the Task Web client to edit the order, manually changing the data received from the CRM system, and retrying the failed task for proper allocation of new ports
- B. suspending the in-flight order in OSM and manually creating a new order to create new ports in the inventory system
- C. reallocating the reserved ports in the inventory system and activating the requested ports in the activation system manually
- D. cancelling the order in OSM and informing the customer that the request cannot be processed
- E. designing OSM to update the CRM system about the failure, so that the customer service representative (CSR) can decide whether to cancel the in-flight order or issue a new revision order to allocate new ports

Answer: E
