### **NEW QUESTION: 1**

- A.** Option D
- B.** Option C
- C.** Option A
- D.** Option B

**Answer: A**

Explanation:

Explanation

Getting Started

Let's try to see how we can create and configure an AWS NAT Gateway:

\* Login to the AWS console, select VPC service and click on NAT Gateways as shown below:Managed NAT gateway - dashboard

\* Provide the necessary details, like subnet and Elastic IP, and create the NAT Gateway. You need to select the subnet which you want to be private subnet and your Elastic IP so that it can communicate to Internet.NAT Gateway - create

\* Once created you will see this:NAT Gateway - success

\* Once the NAT Gateway is created you can edit your routing table to send traffic destined for the Internet toward the gateway. The gateway's internal address will be chosen automatically, and will be in the same subnet as the gateway.

Once the NAT Gateway is configured, you are all set. Your private subnet instances should now be able to communicate with the Internet without much management, monitoring, and configuration overhead.

Sample NAT Gateway architecture: NAT Gateway - design

Migrating from an existing NAT instance

If you are already using a NAT instance in your VPC setup, it's time to migrate now, and I can tell you that it's not tough. You only need to make sure that you create the NAT Gateway in the same subnet as your existing NAT instance. Then you need to edit the route table by replacing the existing NAT reference with the internal address of the new gateway. I told you this was very straightforward. You will need to ensure that you don't have any critical tasks running at the time of migration, because changing a route from a NAT instance to the gateway can result in a dropped connection.

This feature was only very recently introduced by AWS, so it's definitely worth sharing. It can resolve lots of existing concerns. Do you have your own experience with this new feature? Why not share it with others.

### NEW QUESTION: 2

Which AWS service would identify if unrestricted access to a resource has been allowed by a security group?

- A. AWS Trusted Advisor
- B. Amazon CloudWatch
- C. VPC Flow Logs
- D. AWS CloudTrail

**Answer: D**

### NEW QUESTION: 3

レンタカー会社がサーバーレスREST

APIを構築して、モバイルアプリにデータを提供しています。アプリは、リージョンエンドポイントを備えたAmazon API Gateway API、AWS Lambda関数、およびAmazon Aurora MySQLサーバーレスDBクラスターで構成されています。同社は最近、パートナーのモバイルアプリにAPIを公開しました。リクエストの数が大幅に増加し、散発的なデータベースメモリエラーが発生しました。

APIトラフィックの分析は、クライアントが同じクエリに対して短期間に複数のHTTP GETリクエストを行っていることを示しています。トラフィックは営業時間中に集中し、休日やその他のイベントが急増します。

同社は、ソリューションに関連するコストの増加を最小限に抑えながら、追加の使用をサポートする能力を向上させる必要があります。

これらの要件を満たす戦略はどれですか？

- A. Amazon ElasticCache for Redisキャッシュを実装して、データベース呼び出しの結果を保存します。キャッシュを使用するようにLambda関数を変更します。
- B. API Gatewayリージョナルエンドポイントをエッジ最適化エンドポイントに変換します。運用段階でキャッシュを有効にします。
- C. API Gatewayの生産段階で絞り込みを有効にします。レートとバースト値を設定して、着信コールを制限します。
- D. AuroraサーバーレスDBクラスター構成を変更して、使用可能なメモリの最大量を増やします。

**Answer: A**

### NEW QUESTION: 4

Topic 3, Contoso Ltd

Line of Business Applications

The company has a dedicated Microsoft SQL Server 2008 Analysis Services server. The server has five Online Analytical Processing (OLAP) cubes in an Analysis Services instance. The instance uses Windows authentication.

Intranet Requirements

Contoso has the following requirements for its intranet site:

- The intranet site must include 10 sites, each of which corresponds to one of the company's 10 departments.
- Each departmental site must have its own database.
- Numerous Microsoft InfoPath forms and PerformancePoint dashboards must be deployed to the departmental sites. The dashboards must consume data from the OLAP cubes.
- The site must support as many as 500 concurrent connections for InfoPath Forms Services.
- Per-user identity authentication must be used for PerformancePoint Services.

-My Sites must be created as a separate Web application.

-My Sites must be available for all users.

#### Extranet Requirements

Contoso has the following requirements for its extranet site:

-The extranet site must be able to host sites for secure collaboration between the employees of Contoso and the external users of the partner companies.

-Partner company employees must be able to create secure collaboration sites and site collections easily.

-Partner company employees must not have accounts in the Contoso Active Directory forest.

-The extranet site must be created as a separate Web application.

-Each site collection must have a 2-GB quota.

#### Public Site Requirements

Unauthenticated access to the public site must be available to anyone on the Internet.

Authenticated access to the public site must be available to Contoso employees who manage and maintain the site. The public site must be created as a separate Web application.

You are a SharePoint administrator for Contoso, Ltd.

The company has 2,000 employees and 500 external users who work at the offices of various partner companies.

You plan to deploy SharePoint Server 2010 to host an intranet Web site, an extranet Web site, and a public Web site for the company.

You need to recommend a solution to grant partner company employees access to the extranet.

What should you include in the solution?

**A.** Forms-based authentication and the Application Layer Gateway Service (ALG)

**B.** Integrated Windows authentication and Active Directory Federation Services (AD FS)

**C.** Integrated Windows authentication and Active Directory Rights Management Services (AD RMS)

**D.** Forms-based authentication and Active Directory Lightweight Directory Services (AD LDS)

**Answer: D**

Explanation:

Section: Case 3
