* List<T>.Add Method

Adds an object to the end of the List<T>.

Incorrect:

Not A: Gives groups array. Hence ToString(0 method mentioned above won't give desired result

Not D: ICollection.SyncRoot Property For collections whose underlying store is not publicly

available, the expected implementation is to return the current instance. Note that the pointer to the current instance might not be sufficient for collections that wrap other collections; those should return the underlying collection's SyncRoot property.
