**Answer: C**

Explanation:

Topic 4, Litware, Inc Case B

Overview

General Overview

Litware, Inc. is an international manufacturing company that has 10,000 users.

Physical Locations

Litware has two offices. The offices are located in New York and Denver.

The offices connect to each other by using a WAN link.

Each office connects directly to the Internet.

Existing Environment

Active Directory Infrastructure

The network contains an Active Directory forest named litware.com.

The forest contains a single domain.

All domain controllers run Windows Server 2008 R2.

Each office contains two domain controllers.

Each office is configured as an Active Directory site.

Lync Server 2010 Infrastructure

Litware has a Lync Server 2010 infrastructure in the New York office. The infrastructure contains servers and appliances. The servers and appliances are configured as shown in the following table.

All of the servers that have Lync Server 2010 deployed are monitored by using Microsoft System Center Operations Manager.

All client computers have either Microsoft Lync 2010 or Microsoft Office Communicator 2007 R2 installed.

Administrators configure the following Lync Server 2010 features:

IM and presence for all sites

External user access for IM and conferencing

Conferencing for all sites

Response groups

Group Chat

Problem Statements

Litware identifies the following issues:

Users report that other users who are not listed on their contact list can see their presence information. This also occurs when the users set their privacy mode to allow only the users on their contact list to see their presence information.

The users report that when they connect to meetings remotely, they cannot use presenter controls.

Requirements

Business Goals

Litware plans to minimize hardware and software purchasing costs.

Planned Changes

Litware plans to upgrade to Lync Server 2013 during the next six months and plans to implement the following changes during the upgrade:

Migrate the current Front End pool to an Enterprise Edition Front End pool named fepool that will contain two servers named Lync13\_01 and Lync13\_02.

Migrate Group Chat to Persistent Chat.

Technical Requirements

Litware identifies the following technical requirements for the planned changes:

Users running previous client versions must be able to use chat features after the server is migrated to Persistent Chat.

Users who have mobile devices must be able to receive notifications if the Lync mobile application is inactive.

A client computer named Monitor01 must be used to monitor client connectivity by using synthetic transactions.

All response groups must be migrated to Lync Server 2013.

External users must be able to expand distribution groups.

External users must be able to download meeting content.

The Lync 2013 Windows Store app must be supported.

High Availability Requirements

The new Lync Server 2013 infrastructure in the New York office must be available if a single server fails.
