NEW QUESTION: 1

- A. Option D
- B. Option A
- C. Option C
- D. Option B

Answer: B

NEW QUESTION: 2

A technician has been alerted of incoming HTTP traffic on the LAN segment that should not contain any web servers. The technician has the IP address of the destination host and wants to determine if the socket for HTTP is open. Which of the following should the technician perform?

- A. Packet analysis
- B. Baseline assessment
- C. Patch-level assessment
- D. Port scan

Answer: D

NEW QUESTION: 3

You are evaluating the connectivity between the virtual machines after the planned implementation of the Azure networking infrastructure.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer:

Explanation:

Explanation

Once the VNETs are peered, all resources on one VNET can communicate with resources on the other peered VNETs. You plan to enable peering between Paris-VNET and AllOffices-VNET. Therefore VMs on Subnet1, which is on Paris-VNET and VMs on Subnet3, which is on AllOffices-VNET will be able to connect to each other.

All Azure resources connected to a VNET have outbound connectivity to the Internet by default. Therefore VMs on ClientSubnet, which is on ClientResources-VNET will have access to the Internet; and VMs on Subnet3 and Subnet4, which are on AllOffices-VNET will have access to the Internet.
