A. Update your IM&P server to sync off of the same LDAP directory as your Cisco Unified Communications Manager.

B. Add Jabber to your inbound/outbound firewall rules on your PC.

C. Switch your Jabber client to use EDI instead of UDS.

E. Jabber can only pull directly from LDAP and cannot directly search the Cisco Unified Communications Manager user database.

Answer: D

Explanation:

LDAP contact resolution - The client cannot use LDAP for contact resolution when outside of the corporate firewall.

Instead, the client must use UDS for contact resolution.

When users are inside the corporate firewall, the client can use either UDS or LDAP for contact resolution. If you

deploy LDAP within the corporate firewall, Cisco recommends that you synchronize your LDAP directory server with

Cisco Unified Communications Manager to allow the client to connect with UDS when users are outside the corporate firewall.
