The results show that our HCE-5420 study materials are easy for them to understand, We not only do a good job before you buy our HCE-5420 test guides, we also do a good job of after-sales service.

NEW QUESTION: 1

Which statement about VLANs configured in FabricPath mode on a Cisco Nexus 7000 switch is true?

- A. They use classical MAC learning by default.
- B. VLANs configured for FabricPath can exist only on F-Series line cards.
- C. The forwarding engine uses any M-Series line cards present in the switch for MAC proxy forwarding.
- D. FabricPath VLANs requires 802.1Q trunks for forwarding.

Answer: B

NEW QUESTION: 2

Which are valid replies from a RADIUS server to an ACCESS-REQUEST packet from a FortiGate? (Choose two.)

- A. ACCESS-PENDING
- B. ACCESS-CHALLENGE
- C. ACCESS-RESTRICT
- D. ACCESS-REJECT

Answer: B,D

NEW QUESTION: 3

Which statement describes Avaya Contact Recorder (ACR) R12 on Windows or Linux?

- A. It is supported on a 32 bit operating system.
- B. It is supported on a 64 bit operating system.
- C. It is supported with MSSQL running on the ACR.
- D. It is supported with Google Chrome.

Answer: B

NEW QUESTION: 4

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1. Server1 has the DHCP Server server role and the Network Policy Server role service installed.

Server1 contains three non-overlapping scopes named Scope1, Scope2, and Scope3. Server1 currently provides the same Network Access Protection (NAP) settings to the three scopes.

You modify the settings of Scope1 as shown in the exhibit. (Click the Exhibit button.)

You need to configure Server1 to provide unique NAP enforcement settings to the NAP non-compliant DHCP clients from Scope1.

What should you create?

- A. A network policy that has the MS-Service Class condition
- B. A connection request policy that has the Service Type condition
- C. A connection request policy that has the Identity Type condition
- D. A network policy that has the Identity Type condition

Answer: A

Explanation:

A. Restricts the policy to clients that have received an IP address from a DHCP scope that matches the specified DHCP profile name. This condition is used only when you are deploying NAP with the DHCP enforcement method. To use the MS-Service Class attribute, in Specify the profile name that identifies your DHCP scope, type the name of an existing DHCP profile.
