Clean Up Server Metadata

Metadata cleanup is a required procedure after a forced removal of Active Directory

Domain Services (AD DS).

You perform metadata cleanup on a domain controller in the domain of the domain controller that you forcibly removed. Metadata cleanup removes data from AD DS that identifies a domain controller to the replication system.

Clean up server metadata by using GUI tools

Clean up server metadata by using Active Directory Users and Computers

1. Open Active Directory Users and Computers: On the Start menu, point to Administrative Tools, and then click Active Directory Users and Computers.

2. Expand the domain of the domain controller that was forcibly removed, and then click Domain Controllers.

3. In the details pane, right-click the computer object of the domain controller whose metadata you want to clean up, and then click Delete.

Clean up server metadata by using Active Directory Sites and Services

1. Open Active Directory Sites and Services: On the Start menu, point to Administrative Tools, and then click Active Directory Sites and Services

2. Expand the site of the domain controller that was forcibly removed, expand Servers, expand the name of the domain controller, right-click the NTDS Settings object, and then click Delete.
