### **NEW QUESTION: 3**

The sampling distribution of the sampling mean is:

- A. the distribution of all possible means of a given population.
- B. the distribution of the means of all possible samples of a given population.
- C. the distribution of the means of all possible samples of a given size from a given population.

**Answer: C**

Explanation:

The sampling distribution of the sample means is a probability distribution of all possible sample means of a specific sample size.

## NEW QUESTION: 4

- A. Option A
- B. Option C
- C. Option D
- D. Option B

**Answer: A**

Explanation:

CDP contains information about the network device, such as the software version, IP address, platform, capabilities, and the native VLAN. When this information is available to an attacker computer, the attacker from that computer can use it to find exploits to attack your network, usually in the form of a Denial of Service (DoS) attack.
