NEW QUESTION: 1
What is the result of an e-commerce HTTP server that processes the input queue at a rate equal to or greater than that of incoming requests?
A. Network bandwidth decreases.
B. The server performs adequately.
C. The site visitor experiences a delay.
D. A bottleneck occurs.
Answer: B

NEW QUESTION: 2
Your company network includes two branch offices. Users at the company access internal virtual machines (VMs).
You want to ensure secure communications between the branch offices and the internal VMs and network.
You need to create a site-to-site VPN connection.
What are two possible ways to achieve this goal? Each correct answer presents a complete solution.
A. a private IPv4 IP address and a compatible VPN device
B. a public-facing IPv4 IP address and a RRAS running on Windows Server 2012
C. a private IPv4 IP address and a RRAS running on Windows Server 2012
D. a public-facing IPv4 IP address and a compatible VPN device
Answer: B,D
Explanation:

Explanation/Reference:
Explanation:
C (not A): VPN Device IP Address - This is public facing IPv4 address of your on-premises VPN device that you'll use to connect to Azure. The VPN device cannot be located behind a NAT.
D (Not B): At least one or preferably two publicly visible IP addresses: One of the IP addresses is used on the Windows Server 2012 machine that acts as the VPN device by using RRAS.
The other optional IP address is to be used as the Default gateway for out- bound traffic from the on- premises network. If the second IP address is not available, it is possible to configure network address translation (NAT) on the RRAS machine itself, to be discussed in the following sections. It is important to note that the IP addresses must be public. They cannot be behind NAT and/or a firewall.

NEW QUESTION: 3
Your Company Host a public cloud that provides virtual machines to tenants.
You manage the public cloud by using the following components:

You Upgrade Service Manager to System Center 2012 R2 and you import the management packs from VMM.
You need to ensure that you can generate chargeback reports.
What should you do?
A. Copy the management pack files from the Service Manager management server to the VMM server and import the files.
B. Copy the management pack files from the Service Manager management server to the Operations Manager server and import the files.
C. Copy the management pack files from the VMM Server to the Operations Manager server and import the files.
D. Copy the management pack files from the Operations Manager server to the VMM server and import the files.
Answer: C
