NEW QUESTION: 1

Which one of the following is the key techniques to create cloud infrastructure?

- A. Data Classification
- B. Orchestration
- C. Automation
- D. Orientation

Answer: B

Explanation:

The key techniques to create a cloud are abstraction and orchestration. We abstract the resources from the underlying physical infrastructure to create our pools, and use orchestration (and automation) to coordinate carving out and delivering a set of resources from the pools to the consumers. As you will see, these two techniques create all the essential characteristics we use to define something as a "cloud."
