#### **NEW QUESTION: 3**

Your network contains computers that run either Windows Vista (x86) or Windows 7 (x86). All computers are joined to a domain.

You install a computer named Computer1 that runs Windows 7 (64-bit). You share a printer named Printer1 on Computer1.

You need to ensure that any user can automatically download and install the drivers for

Printer1.

What should you do from Printer Properties?

- A. Enable bidirectional support.
- B. Install a new driver.
- C. Assign the Manage this printer permission to the Domain Users group.
- D. Modify the Additional Drivers settings.

**Answer: D**

Explanation:

Explanation/Reference:

Explanation:

If you are going to be sharing a printer with computers running previous versions of Microsoft Windows, you can add the drivers for the printer using Additional Drivers. When you add additional drivers, other computers on the network that do not have the printer drivers installed are able to download them from the computer that is sharing the printer.
