NEW QUESTION: 1

Mark the MT-RJ connector in the image given below.

Answer:

Explanation:

Explanation: The image displays the following connectors:

MT-RJ: The MT-RJ connector is the most recent type of small form factor fiber optic connector. The MT-RJ fiber connector is less than half the size of the SC duplex connector and transceiver, so it doubles the port density of fiber-optic LAN equipment. The connector is a 2-fiber connector and takes up no more room than an RJ-45 jack.

Fiber-LC: The LC connector was developed to meet the need for small and easier-to-use fiber optic connectors. The LC connector reduces space required on panels by 50%.

RJ-45: RJ-45 is a type of connector similar to an RJ-11 telephone connector, but it is larger in size because it has eight conductors. The unshielded twisted-pair (UTP) and shielded twisted-pair (STP) connections use RJ-45 connectors in computer networks.
